Security Governance

1 Provider Exposure Statement

RetailHub declares that all shared systems covered by the customer-provider relationship have been patched against the PHP2Shell vulnerabilities (CVE-2026-109618 and CVE-2026-109619).

The provider states that the required PHP security updates have been deployed across all shared systems.

2 Customer Assurance Request

SmartCity requests evidence supporting RetailHub's statement that all shared systems have been patched against PHP2Shell.

The requested evidence includes:

- Post-deployment PHP version checks for all shared systems.
- Provider deployment records documenting the applied patches.
- A dated compatibility-test record produced by SmartCity, referenced in the provider's deployment record, as Complementary User Entity Control (CUEC) evidence.

3 Inventory

Table 1: IT Systems Inventory and Security Assessment

System Name	Description	Owner / Patch Owner	PHP Version	Internet Facing	Hosting	Shared System	Risk Level	Status
1. IN-STORE INVENTORY								
RETAILHUB-INV 01	Warehouse stock and product availability management.	RetailHub / RetailHub	8.3.13	No	On-premises	No	Low	Vulnerable
RETAILHUB-EMPL 01	Monitoring of sales performed by employees during their shifts.	RetailHub / RetailHub	8.2.22	No	On-premises	No	Medium	Vulnerable
RETAILHUB-PROM 01	Management of product discounts and promotional campaigns.	RetailHub / RetailHub	8.4.27	No	On-premises	No	Low	Patched
RETAILHUB-SALES 01	Recording and monitoring of daily sales transactions.	RetailHub / RetailHub	8.5.12	No	On-premises	No	Medium	Patched
RETAILHUB-SM 01	Management of supplier orders and delivery schedules.	RetailHub / RetailHub	8.5.10	No	On-premises	No	Medium	Vulnerable
RETAILHUB-BACKUP 01	Monitoring and management of backups of business-critical data.	RetailHub / RetailHub	8.3.10	No	On-premises	No	High	Vulnerable

System Name	Description	Owner / Patch Owner	PHP Version	Internet Facing	Hosting	Shared System	Risk Level	Status
2. E-COMMERCE INVENTORY								
RETAILHUB-CATALOGUE 01	Management of online products, descriptions, images, prices and availability.	RetailHub / RetailHub	8.5.12	Yes	Cloud	Yes	Medium	Patched
RETAILHUB-CLIENTAUTH 01	Management of customer accounts, personal data, shipping addresses and authentication information.	RetailHub / RetailHub	8.4.26	Yes	Cloud	Yes	High	Vulnerable
RETAILHUB-PAYMENT 01	Management and verification of customer payments and financial transactions.	RetailHub / RetailHub	8.4.21	Yes	Cloud	Yes	High	Vulnerable
RETAILHUB-SHIP 01	Management of shipments and tracking of delivery progress.	RetailHub / RetailHub	8.2.33	Yes	Cloud	Yes	Medium	Vulnerable
RETAILHUB-RETURNS 01	Management of customer returns, returned product status and warehouse updates.	RetailHub / RetailHub	8.2.35	Yes	Cloud	Yes	Medium	Patched
3. SHARED SYSTEMS								
CITY-RETAIL-01	Shared Retail and SmartCity portal.	RetailHub and SmartCity / RetailHub	8.4.26	Yes	Cloud	Yes	High	Patched
CITY-RETAIL-02	Shared Retail and SmartCity portal.	RetailHub and SmartCity / RetailHub	8.4.27	Yes	Cloud	Yes	Low	Patched
SMARTCITY-SVC-01	API providing access to SmartCity services.	SmartCity / SmartCity	8.3.35	Yes	Cloud	Yes	High	Patched

4 Remediation Plan

4.1 Remediation Actions

System Name	Identified Issue	Remediation Action	Responsible Team	Priority	Target PHP
RETAILHUB-BACKUP 01	Outdated PHP (8.3.10), vulnerable to PHP2Shell.	Upgrade to PHP 8.3.36. Verify backup data integrity and control access.	RetailHub	High	8.3.36
RETAILHUB-CLIENTAUTH 01	Outdated PHP (8.4.26), vulnerable to PHP2Shell.	Upgrade to PHP 8.4.27. Enforce Multi-Factor Authentication.	RetailHub	Critical	8.4.27
RETAILHUB-PAYMENT 01	Outdated PHP (8.4.21), vulnerable to PHP2Shell.	Upgrade to PHP 8.4.27. Guarantee payment-data protection.	RetailHub	Critical	8.4.27

System Name	Identified Issue	Remediation Action	Responsible Team	Priority	Target PHP
RETAILHUB-EMPL 01	Outdated PHP (8.2.22),vulnerable to PHP2Shell.	Upgrade to PHP 8.2.35. Implement role-based access control to restrict the access to company data and employees personal information.	RetailHub	Medium	8.2.35
RETAILHUB-SM 01	Outdated PHP (8.5.10), vulnerable to PHP2Shell.	Upgrade to PHP 8.5.12. Implement role-based access control to restrict the access to order data and suppliers' personal information.	RetailHub	Medium	8.5.12
RETAILHUB-SHIP 01	Outdated PHP (8.2.33), vulnerable to PHP2Shell.	Upgrade to PHP 8.2.35. Protect customers' personal information and shipping data.	RetailHub	High	8.2.35
RETAILHUB-INV 01	Outdated PHP (8.3.13), vulnerable to PHP2Shell.	Upgrade to PHP 8.3.36. Implement role-based access control to restrict inventory-management operations.	RetailHub	Low	8.3.36

4.2 Remediation Tracking and Verification

Table 3: Remediation Tracking and Verification

System Name	Policy Deadline	Completion Date	Status	Evidence of Remediation
RETAILHUB-BACKUP 01	28/10/2026	27/10/2026	Completed	Post-deployment PHP version check: PHP 8.3.36
RETAILHUB-CLIENTAUTH 01	28/10/2026	26/10/2026	Completed	Post-deployment PHP version check: PHP 8.4.27, multi-factor authentication test passed.
RETAILHUB-PAYMENT 01	28/10/2026	27/10/2026	Completed	Post-deployment PHP version check: PHP 8.4.27, payment-data security test passed.
RETAILHUB-EMPL 01	28/10/2026	28/10/2026	Completed	Post-deployment PHP version check: PHP 8.2.35, role-based access control test.
RETAILHUB-SM 01	28/10/2026	28/10/2026	Completed	Post-deployment PHP version check: PHP 8.5.12, role-based access control(RBAC) test passed.
RETAILHUB-SHIP 01	28/10/2026	27/10/2026	Completed	Post-deployment PHP version check: PHP 8.2.35, customer-data protection test passed.
RETAILHUB-INV 01	28/10/2026	28/10/2026	Completed	Post-deployment PHP version check: PHP 8.3.36, role-based access control(RBAC) test passed.
